§ 1030.61 Producer price differential.

For each month the market administrator shall compute a producer price differential per hundredweight for Zone 1. If the unreserved cash balance in the producer settlement fund to be included in the computation is less than 2 cents per hundredweight of producer milk on all reports, the report of any handler who has not made the payments required pursuant to § 1030.71 for the preceding month shall not be included in the computation of the producer price differential. The report of such handler shall not be included in the computation for succeeding months until the handler has made full payment of outstanding monthly obligations. Subject to the aforementioned conditions, the market administrator shall compute the producer price differential in the following manner:

(2) Add values computed pursuant to § 1030.60 (a)(3), (a)(4), (a)(5) and (a)(6); and subtract the values obtained by multiplying the handlers' total pounds of protein and total pounds of other solids contained in such milk by their respective prices, and the total value of the somatic cell adjustment;

(b) Add an amount equal to the total value of the minus location adjustments computed pursuant to § 1030.75(a);

(c) Add an amount representing not less than one-half the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

7 CFR Ch. X (1-1-99 Edition)

(2) The total hundredweight for which a value is computed pursuant to § 1030.60(f); and
